Experience

Nike, Inc. Aug 2025 – Present
Software Engineer 1 Beaverton, OR

- Architected observability infrastructure for SNKRS web platform as the sole SRE, building New Relic dashboards, NRQL queries, and Python automation for dashboard and alert generation at scale.
- Debugged production issues across Nike's frontend stack (React, Swift, Kotlin) using New Relic and Splunk, tracing root causes and collaborating with engineering teams to implement fixes for issues affecting user experience.
- Owned observability for Nike.com and Nike App through multiple high-visibility product launches, supporting on-call rotation and incident response for millions of users while maintaining 99.99% service availability.

Nike, Inc. Jun 2024 – Aug 2024
Software Engineer Intern Beaverton, OR

- Built Storepedia end-to-end with React frontend, Node.js backend, and DynamoDB, shipping production-ready full-stack application serving Nike retail operations with Docker containerization.
- Contributed to RDS Sweeper identifying idle database instances, driving \$1.7K/day in cost savings (\$600K+ annually) with expansion underway across AWS environments.
- Architected and deployed AWS infrastructure (EC2, S3, DynamoDB) supporting Storepedia's production environment, configuring containerized application deployment and establishing operational runbooks.

Oregon State University Jun 2019 – Jun 2024
Software Engineer and Research Assistant Corvallis, OR

- Co-authored 4 peer-reviewed publications on developer productivity, privacy, and HCI, including ACM ICSE 2020 Distinguished Paper (top 3%) and ACM CHI 2020 Best Paper Honorable Mention.
- Updated deprecated Python libraries and designed Apache Airflow pipeline automating data collection, reducing manual processing overhead and enabling real-time analysis dashboard.
- Collaborated across interdisciplinary teams and presented technical findings, strengthening technical communication and problem-solving skills.

Projects

Lavender | *React, Vite, Firebase, Python*

- Personalized sleep scheduling application for shift workers informed by sleep psychology; features interactive schedule visualization, AI recommendations, and Firebase backend.

Deus | *React, TypeScript, Gemini API*

- Interactive music education app with custom React keyboard component, touch/keyboard bindings, and AI music theory tutor.

Education

Oregon State University Sep 2021 – Jun 2025
Bachelor of Science in Computer Science, Summa Cum Laude Corvallis, OR

Relevant Coursework: Operating Systems, Algorithms, Data Structures, Computer Networks, Parallel Programming, Databases, Cybersecurity, Web Development, Mobile Development

Technical Skills

Languages: TypeScript, JavaScript, Python, C/C++, SQL, Swift, Kotlin

Technologies: React, Node.js, AWS (ECS, EC2, S3, DynamoDB, RDS, Route 53, CloudWatch), Docker, Firebase, New Relic, Splunk, Apache Airflow, GitHub Actions, Jenkins, Terraform
