Experience

Nike, Inc.

Aug 2025 – Present

Software Engineer 1

Beaverton, OR

- Developed TypeScript and JavaScript solutions for Nike's production web platform, integrating observability and telemetry to improve reliability and debugging.
- Built Python automation and services using AWS, New Relic, and Splunk to improve production monitoring, reduce alert noise by 90%, and accelerate incident resolution.
- Automated infrastructure and release workflows using Python and NRQL, supporting global deployments and maintaining 99.99% service availability.

Nike, Inc.

Jun 2024 – Aug 2024

Software Engineer Intern

Beaverton, OR

- Built and owned Storepedia, a React/Node.js application for Nike Retail, translating user needs into a production solution that reduced technical support tickets by 35%.
- Deployed AWS infrastructure using EC2, S3, DynamoDB, Route 53, Docker, and Jenkins CI/CD to support application development and delivery.
- Developed Python automation tools to analyze AWS infrastructure usage, identify inactive resources, and reduce cloud costs by over \$600K annually.

Oregon State University

Jun 2019 – Jun 2024

Software Engineer and Research Assistant

Corvallis, OR

- Conducted software engineering and human-computer interaction research exploring developer productivity, privacy, usability, and how people interact with technology.
- Developed research tools and automated workflows using Python, Docker, and Apache Airflow while collaborating with interdisciplinary research teams.
- Presented technical research at the ASE Symposium and contributed to three peer-reviewed publications, including an ACM SIGSOFT Distinguished Paper Award.

Projects

Deus | React, TypeScript, Gemini

- Built an interactive music education web application with a team during a one-day hackathon, developing the interactive keyboard, learning interface, API integrations, and AI-powered assistant.

Daily Digest | Python, APIs, GitHub Actions

- Built an automated dashboard that collects data from multiple APIs, generates structured Markdown reports, and deploys updates through GitHub Actions.

Education

Oregon State University

Sep 2021 – Jun 2025

Bachelor of Science in Computer Science, Summa Cum Laude

Corvallis, OR

Relevant Coursework: Operating Systems, Algorithms, Data Structures, Computer Networks, Parallel Programming, Databases, Cybersecurity, Web Development, Mobile Development

Technical Skills

Languages: TypeScript, JavaScript, Python, C/C++, SQL, Swift, Kotlin

Technologies: React, Node.js, Express, AWS, Docker, Terraform, Git, GitHub Actions, Jenkins, New Relic, Splunk, Apache Airflow
